## Planning for Energy Conservation

When planning a project for your home, be sure to consider energy efficiency. An energy-efficient home or building costs less to heat or cool, is quieter and more comfortable, and will sell faster and at a higher price.

California law requires new and remodeled buildings to meet or exceed certain energy efficiency standards. Aiming for optimal energy efficiency can have significant financial benefits, such as:

- 💡 Rebates or low-interest loans from utility companies
- 💡 Rebates from the manufacturers of energy-efficient products and appliances
- 💡 Energy-efficient mortgages and other advantageous financial incentives from lending institutions

Additional information on California's energy efficiency standards is available from the California Energy Commission at (800) 555-7794 or by visiting [www.energy.ca.gov](http://www.energy.ca.gov).

## An Orange a Day Can Keep the Wrinkles Away?!

It's not just for the common cold anymore... vitamin C is the anti-wrinkle super food! Our skin reflects what we eat and, applied topically, vitamin C serums and lotions can also benefit the epidermis. First, vitamin C dramatically increases the synthesis of collagen, a key structural protein for the skin. Second, vitamin C is an antioxidant and can help reduce skin damage caused by free radicals. When vitamin C is properly delivered into skin cells, there is a good chance it will reduce wrinkles and improve skin texture. You can say this superior antioxidant "lightens, tightens and brightens."

There is increasing evidence that vitamin C shields the skin from the sun's burning rays. A lifestyle of organic fruits and vegetables containing high vitamin C content combined with a morning skin care routine that contains vitamin C serum will dramatically change your skin and reverse sun damage while slowing the aging process.

Make sure you look for a quality, stabilized vitamin C. My favorite is a serum from the Spa Gregorie's Signature Line. This vitamin C serum is a light, oil-free gel that has a wealth of skin-friendly ingredients. The addition of salicylic acid in this serum addresses clogged pores and impurities helping to exfoliate, promote elastin and collagen and brighten the skin. Some vitamin C can dry or irritate skin. Spa Gregorie's vitamin C is aloe vera based and contains squalene and jojoba, which helps soften and nourish the skin. Your skin will feel firmer, hydrated and have a brighter clarity within two weeks.

The aging process is not set in stone. Let's keep our systems in the best shape possible for the long haul. Inside and out, vitamin C is the anti-wrinkle super food.

## Spring Planting

There is still time to begin those gardening tasks that will help make summer relatively maintenance-free and water-wise. It is not too late to try these tips:

- 🌸 Accurate water delivery is crucial to plant health. Check your irrigation system for accurate coverage and your garden hoses for holes or leaky fittings.
- 🌸 Cultivate your shrubs and flower beds, followed by fertilization and liberal mulching. Soil maintenance will keep the soil permeable, and the leaching of salts will allow the fertilizer to get to the plant's roots. Mulch will contribute substantially to moisture retention and can reduce water use by as much as 50%.
- 🌸 There is still time to introduce plants. Provided the plant material is well rooted and handled carefully, it will acclimate to the forthcoming summer sun and heat.

## Bulb Gardening Tips

There is still time to grow a bulb garden. Here are a few tips for late-season success in bulb gardening:

- Plant daffodils, gladiolas and other late-season bulbs; check with your nursery for other varieties.
- Use controlled soil; planting in a planter or large pot makes the task of winterizing the bulbs easier; and provides greater effectiveness of fertilizers.
- Keep soil moist, but not saturated. Bulbs will flower in 30 to 60 days.
- Allow the spent flower to remain until the stalk starts to turn brown; this is a sign that the seeds have dropped.

When the garden becomes dormant, dust the bulbs you have dug up with a fungicide and store in a cool dark place in a paper bag. Plastic bags trap moisture and should not be used.
